Poems

Blue Butterfly

MY BLOOD

MY blood needs food.
MY body needs oxygen.
MY parts need both food
and air.
Food from my small
intestine to my ear, and
air from my lungs
to my toes. It is my
blood take it.

MY HEART

Blood flows all though my body. My heart is made of muscle.
It is a long strong pump in my body.
My blood moves because it is
being pushed by my heart. My heart is the
size of my fist. My heart has four rooms
in it. My heart has two pumps. I cannot
live with out a heart. YOU can have a
heart for anything.

EATING

Cars need gas to run.
I need food to live.
I put food in my mouth.
I chew.
The food goes to my stomach.
My stomach is made of muscle.
It mixes up the food.

UNC Students

Skate Egg Case

A blackened shell
Of a life born new
Washed gently ashore
By the water so blue

Clinging to seaweed
It floats in the breeze
An oceanic bird
In aquatic seas

A miracle of birth
From water to land
It now sits in a giftshop
In a bowl of fake sand

Sand Dollar by S. Pretty

Colonial strength
Offerring security
Reaching for prisoners
Always soft, in and out
Limited in place

Sharp teeth
Anatomy flat snout and stocky body
No more than two pups are born at a time
Diet it eats fish

Strongest shark in the uterus eats other shark babies
Hazardous to people not very often, can be dangerous to swimmers
Anal fin is the third fin back on the bottom
Reproduction has a gestation period of 9-12 months
Kingdom animalia

DisneyWorld 3-D Blue Butterfly

I was walking around and I saw Raven. And we went to a place that looks like a beach but it's inside and we were wearing 3D glasses. And it had sand dollars, shells, crabs, sea horses and the sun was out. We built a sand castle. After we built our sand castle, we put our goggles on and went under the water. And then we went under and we were talking to Nemo. And they had a castle under the water with a party going. We played games. We had bacon pizza with sprite. We talked to the fishes. We said "Do you wanna play some games?" because we brought some down there. They said "yes", and Raven had a new game so she brought it and I brought some like car games and we played Uno, too. And we danced after we played and I won the game. We danced to Raven. After we danced we watched the Cosby show and Walker. And they had a computer down there we so we brought a book to read, too.

After we read books and stuff we played hide and seek and I was a good hider. I hid over at another castle that they didn't even think of. Before we finished our game, something warned us that someone came down there. So we put everything up and me and Raven came from under the water and the kid asked us what we were doing under the water for so long. We said "we were just playing and swimming around". And the kid said "ok" and he came from under the water and he left. So after the kid left, we went back to our game. The movie started getting over so we came out and we left and went back to DisneyWorld. And we said we'd see each other next time after we got something to eat. The End.
